is a solutions focused global
Manufacturer
and Supplier of
custom designed valves.**

SRU Steam Jacketed Acid Gas Control
BFV British Petroleum WY USA

We take this opportunity to introduce ourselves as a specialized valve manufacturer supporting companies when they have run out of options due to any of following scenarios:

1. Existing model of the valve is obsolete or the manufacturer is out of business.
2. Non standard dimensional requirements like Face to Face or Bolt Patterns.
3. Exotic metallurgy is required.
4. Special coatings or linings are required.
5. Valve performance is poor due to process condition changes or enhanced capacity requirements.
6. The valve is experiencing repetitive failure.
7. Unable to obtain spare parts or existing vendor's pricing is too high.
8. Your approved manufacturers are declining to quote.
9. Delivery is critical.

Wind Tunnel Emergency Vent Control Valves
US. Air Force Base, Tullahoma TN. USA
